Current Comment

By R. H. K.

The opinions (if any) expressed
herein, are not necessarily those
of The Campbell Press.

The time is at hand for motorists to be doubly careful at all hours of the day, for after this week, and until fall, children will not be enjoying the protection of school playgrounds for part of each day, but will be "on the loose" at all times. Those of primary age haven't room in their little skulls for more than one thought at a time. In other words, if they're concentrating on a ball, they have no thought for the dangers of the street. Therefore, it is up to us—who should be able to hold more than one thought at a time—to do their thinking for them. The moment a motorist enters city limits, or other areas where children are apt to be at play, he—and/or she—should automatically slow down and be on the alert for the sudden appearance of a child in the roadway. Try it a few times—it soon becomes habit.

Big days at the schools here this week.

Youngsters graduating from the elementary school have no weighty decisions to make—no choosing of a path—for their paths are clear and the decisions ready made. They will go to high school for the next four years.

The young men and women who are graduating from high school, however, face an altogether different situation. They have decisions to make; paths to choose.

In these days of depression and uncertainty, and with the existing scarcity of jobs, graduates will do well to seriously consider their abilities and lack of abilities before deciding to pit them against the world without further education. That was good advice even in the palmy days; it is doubly good today. And it comes from one who muffed his own education pretty thoroughly.

A brief survey will reveal to the young hopeful that most employers give preference to college people, and demand the cream of the crop at that. So the high school graduate should take any opportunity that presents itself for further education, and if the opportunity fail to appear, he should make one for himself. He—or she—is indeed without ambition who will not create the opportunity to at least complete a San Jose State college two-year vocational training course. These courses are available in numerous lines, and they yield, I believe, 96 units which can later be applied on a four-year course for a bachelor's degree, if the student wishes to continue in school. It is the experience of the college that young men and women, prepared by these courses, have, usually, much better fortune in securing employment in the trades and business professions than those fresh out of high school. I recommend them heartily for those who do not plan university work, for those to whom circumstances dictate early employment, and to those who are perhaps not academically fitted for the more formal courses either at San Jose State or elsewhere. Parents please take note.

Bon Voyage Party For Lois Bachman

Miss Lois Bachman, who sails next Thursday on the Lurline for a three-weeks' vacation in Hawaii, was honored at a bon voyage breakfast Tuesday morning at O'Brien's. The affair was given by her sister workers of the Herold Shoe company, who presented her with a lovely gift.

Today is Miss Bachman's birthday and that event has also been made the occasion for many travel gifts.

Miss Lulu Caldwell will be a fellow voyager, and a party of relatives and friends will be present to bid them farewell when the boat leaves the pier.

Miss Bachman was one of the four attractive young ladies who rode on the Santa Clara county float in the V. F. W.'s colorful parade Tuesday evening.

Service Club Closes Season

The Women's Service club closed its season's activities Wednesday with a delightful picnic under the arbor in the lovely garden of the A. W. Wellington home.

Mrs. F. B. Peake, the retiring secretary gave an interesting report of the years activities.

The recently elected officers were installed, Mrs. G. E. Farley as president to direct the destinies of the group for 1938-39.

Some 26 were present, among them being Miss Catherine Duggan of Petaluma and Mrs. Clara Lee Jenkins of Whittier.

COMMERCE GROUP WILL MOVE TO EXTEND AVENUE

With some projects completed and others well under way the Chamber of Commerce has taken up several road projects which were considered at the Monday meeting.

One of these is the old one of extending Campbell avenue west, which would connect it with the present Santa Clara-Saratoga road near its junction with Prospect road.

The second is the straightening of the highway between Campbell and Los Gatos by having the route follow the Southern Pacific railroad track from the crossing by the Fish auto wrecking plant to Vasona. The Los Gatos Chamber is also interested in the project.

The third proposal is to open a road along the now unused Almaden railroad grade. Cambrian residents are interested in this plan and the groups will work together for it.

The sanitary project has reached another important stage. The legal petition requesting the Board of Supervisors to organize a sanitary district, the boundaries of which are designated, is published in this issue of the Press.

Men Plan Club Dinner, Program

The recently organized Men's club met last evening in the parlors of the Congregational church for its first regular meeting with a large number present.

President Ray Fish presided over a short business session at which plans were made for the June 29 gathering, which will begin with a 7 o'clock dinner arranged entirely by the men.

Eugene Grattan will be the speaker, his subject, "Crime As a Profession," and there will be other items on the program.

The supper committee includes George Jeffers, chairman, George Garner, Claude Block, Paul Frank and Glen Du Bois.

This will be the concluding meeting until September, when the list of charter members will be closed.

Other officers and committeemen are George Jeffers, Claude Block, Roland Hughes and Stanley Smith.

Methodist Church Scene Of Beautiful Wedding

White sweetpeas and lillies contrasted with sprays of smilax and fern to form a lovely setting for the 6 o'clock ceremony on Saturday evening, when Miss Beryl Ione Morgan and Roy David Wilson were united in marriage at the Methodist church here, with the couple standing before an altar adorned with the white blossoms and tall white tapers. The Rev. Edwin Bowling officiated at the ceremony, which was attended by a number of relatives and friends of the couple.

Two vocal selections, "I Love You Truly," and "Love Sends A Little Gift of Roses," were sung by Mrs. Evan H. Wild of Pacific Grove, and the organist was Mrs. Mildred Farley of Campbell.

Miss Lois Morgan of Greenfield, sister of the bride, was the bridesmaid, and Philip Farley of Campbell served the bridegroom as best man.

Acting as ushers were Miss Helen Arnold of Salinas and Miss Madeleine Byrnes of Campbell, and the candle-lighter was Miss Helen Neal. Mrs. Farley played Mendelssohn's wedding march.

Following the ceremony a reception was held at the home of the Rev. and Mrs. Bowling at the parsonage, where the pastel shades were carried out in the decorative motif. Baskets of summer blossoms

SO NEAR AND YET SO FAR

Scouts to Honor Memory of Late J. E. Townsend

Scout organizations and their leaders, of Campbell, will participate in interesting ceremonies next Thursday evening, June 23 at 7 o'clock, at the Scout hall on North Third street.

The occasion will be the dedication of a flag pole and placement of a memorial plaque honoring the late J. E. Townsend, who was an ardent worker in the Boy Scout movement, and local committeeman.

The three groups, Cub Scouts, and Sea Scouts, have been invited to join in the brief program.

The public is cordially invited to attend.

"Stamps of the West" Available At Grattan's

The "Stamps of the West" which the Associated Oil company is distributing through its dealers are attracting considerable attention and will be an advertising medium of attractions to local travelers and tourists. A more detailed account will appear in the Press next week.

The Grattan garage handles Associated products in Campbell.

Former Tavern Operators Manage Holt's Palm Inn

Local friends of Mr. and Mrs. Court Schuler, who for a number of years operated Court's Cabin on Johnson avenue, will be pleased to learn that they are going into business again. They are to be operating managers of Holt's Palm Inn on Monterey road, three miles south of San Jose.

Opening formally next Wednesday, June 22, the Schulers' new venture will feature home-cooked meals, refreshments, and entertainment. Court and "Madame Queen" will be pleased to see old friends at the new stand.

Campbell Folk To Graduate From S. J. State

Graduating this week from San Jose State college will be three residents of Campbell.

Barbara Root, Elin Linnea Swanson, and Margaret James have all earned general elementary teaching credentials.

The commencement exercises will be held Friday afternoon, June 17, at 4 o'clock, with large numbers of homecoming alumni in the audience.

Kiwanians Hear Dick Morton on "Tax Avoidance"

The Kiwanis club heard a very interesting talk Tuesday by Richard Morton on "Tax Avoidance" in which he explained especially legal ways of reducing income and inheritance tax payments.

Eugene Green was soloist for the day, accompanied by Joan Kennedy. Jack Murdock was chairman.

Next week Dr. Will G. Sheffer, orthodontist, of San Jose, will explain the newest methods and art of straightening teeth. He will be introduced by Dr. Morgan.

The Campbell club has been invited to Mountain View next Wednesday to join them in greeting Palo Alto and San Jose club when Fred C. Parker, international secretary of Kiwanis, will be the speaker.

Coming Nuptials In Honolulu, T.H., Are Announced

The engagement of Miss Dorothy Palmateer and Thomas F. Sourisseau, which occurred in the Hawaiian islands, is being announced to friends here by young Sourisseau's mother, Mrs. Maude Sourisseau of the Campbell Union Grammar school faculty.

The bride-elect is a daughter of Mr. and Mrs. W. H. Wakefield of Lodi. She is an accomplished musician, a graduate of the University of Southern California.

While in the states she was worthy advisor and grand representative to the state of Montana Assembly of Wood-Lo, and was president of the Marc club.

At present she is secretary to the president of the Bank of Kukululu, island of Maui, T. H.

The prospective groom as a young boy lived here with his parents. His father, Thomas F. Sourisseau, Sr., who was a local manufacturing jeweler, passed away a number of years ago, and his mother moved to San Jose. The youth continued his education in San Jose, spending two years at San Jose State Junior college, as it was then known, and completing his university work at Berkeley. There he was affiliated with the Phi Delta Chi and Kappa Alpha fraternities.

He is now assistant manager of the Maui Drug company, Wailuku, Maui, T. H.

Mrs. Sourisseau and her sister, Mrs. Viola Dougherty of the Palo Alto schools, will sail July 7 on the Lurline to attend the wedding which will take place in early August in Honolulu.

The young people will reside in Wailuku where a new home is being completed for them.

Dr. Franklin Files For Lieut.-Gov.

Santa Barbara — Dr. Walter Scott Franklin of Santa Barbara, distinguished California physician, has filed his formal declaration of candidacy for lieutenant governor here.

Rancher as well as physician and for many years a member of the University of California medical staff, Dr. Franklin bridged party lines and filed for three nominations—Republican, Democratic and Progressive. He is a registered Republican.

"If elected lieutenant governor," said Dr. Franklin, "I shall do my utmost to see that government lives within its income. Instead of seeking new ways to raise money, we should look for ways of saving the money we already have. If the individual family can cut its budget to fit its income, the state can do likewise, without eliminating any of the essentials or crippling any worthwhile agency.

"We can have jobs for our unemployed in California when we relieve agriculture, business and industry of excessive tax burdens which divert funds to government that properly belong in pay envelopes."

Miss Irene Sawyer, whose school in Santa Barbara closes tomorrow, will arrive home on Saturday.

Here's High School Graduation Program For Tomorrow Nite

At the high school graduation exercises tomorrow evening in the grammar school auditorium there will be featured several brief addresses by students. Included will be "Building at Campbell High School," Eva Borg; "Building for an Esthetic Appreciation," Virginia Roe; "Building for Physical Culture," Nick Pisano; "Building for College and the Vocations," Clyde Allen, and "Building for Citizenship," Frank Ono.

The program will start with the porcession, Knights of the King, Part I, Ketelbey, played by the high school orchestra, and will include the invocation asked by the Rev. J. H. Bennett, a vocal solo by Martha Boyd with Edith Hughes at the piano, cello solo, Martha Jane Bohman, Edith Hughes accompanist, high school chorus in "Hear My Prayer," James Stickle, directed by C. P. Klassen; "Thanks be to God," Dickens, sung by Edmarie Evans, Frances Frisch and Eva Borg, Miss Hughes, accompanist; Hungarian Rhapsody II, Liszt, the orchestra, directed by A. A. Thielke; awarding of scholarship pins, Miss Eunice Reader; awarding U. C. Alumni scholarship to Ione Gardner, Mrs. Lewis; presentation of diplomas, W. H. Van Dyke, principal; the singing of the first and last verses of "America" by the audience; benediction asked by Reverend Bennett, and the recessional, Part II of Knights of the King.

Graduates will greet friends and relatives in the cafeteria immediately following the exercises.

Aid Sought for Starving Chinese

Poplar buds, thistles, scraps of refuse and leaves mixed with clay are now being eaten by great numbers of homeless Chinese civilians in an effort to stave off death by starvation, according to cables received from China by Col. Theodore Roosevelt, Jr., national chairman of the United Council for Civilian Relief in China.

Dispatched by Dr. J. Earl Baker and Mrs. E. F. Henry, who are directing relief activities among Chinese non-combatant refugees in Shanghai, the cables report that even in regions under Japanese control, destitute Chinese are eating bark, grass and herbs, a deadly diet not resorted to since the great famine of 1921.

With receipt of the cables, Col. Roosevelt renewed his appeal to Americans to attend the "bowl of rice" parties being held in 2,000 American cities on June 17 by the United Council for Civilian Relief in China. A large part of the funds raised by these parties will be allocated immediately to the American Advisory committee which for years has been directing relief activities throughout China, Col. Roosevelt added.

He declared that since the establishment of Japanese authority in Shanghai, only the scantiest attempts have been made by the invaders to feed the more than 246,000 Chinese civilians whose homes in Shanghai were destroyed by Japanese bombardments.

"The crisis is made more acute by the first outbreak of cholera in Shanghai in years," Col. Roosevelt stated. "Cables report that a cholera epidemic is raging in one refugee camp near Shanghai where 43,000 Chinese civilians, mostly women and children, are quartered," he said.

Mrs. Andrew Larson (nee Mamie Coupland) and children were weekend guests of Mr. and Mrs. W. R. Coupland. They were on their way from their home in Dunsmuir to San Pedro, where Willis Larson, one of the sons who is in the navy, was to embark on a three-year cruise. Miss Ethel Larson, who spent last summer in Campbell, remained with her grandparents and will be here for some weeks.

CALIFORNIA News of the Week

Boys Win Sewing Contest
Roseville.—Girls took a back seat to the boys in the sewing contest staged in the city park as a project of the Roseville Recreation Committee during the last three weeks. First prize for the best work went to Wayne Hunter and second place went to J. S. Whitehead. Despite the fact that many girls participated, the boys turned in the neatest and most carefully worked articles.

Low Bid Submitted
Sacramento.—The Frederickson & Watson Construction Company and Heafey-Moore Company, Oakland, submitted a low bid of \$83,182 for building a government warehouse and storage yard at the Shasta damsite near Redding, the Federal Bureau of Reclamation announced here recently.

Proof of 5000-Year Old Race Found
Santa Barbara.—Evidence has been discovered that a "Mayan-like" race inhabited the Mojave Desert at least 5,000 years ago, David Banks Rogers, anthropologist of the Santa Barbara Museum of Natural History, stated recently. The Mayans of Guatemala and Yucatan had the most advanced prehistoric culture in the Western Hemisphere, but their history can be traced back only about 2,500 years. Rogers believes the recent discovery opens up an entirely new vista into the antiquity of this ancient people. In two small canyons in the Granite Mountain foothills, 40 miles east of Barstow and 2,000 miles from Guatemala and Yucatan, Rogers found and studied for weeks a series of pictographs scratched into the canyon walls with stone chisels. These Mayan-like symbols apparently had only religious significance to those who carved them.

Smoking Areas Posted
Porterville.—Because of increasing dryness of grass and pine areas, Supervisor Joseph Elliott of Sequoia National Forest has closed the forest below the 7000-foot level to smoking except in posted areas and places of habitation. For convenience of the public, several places on roads and trails where smoking is permitted will be posted with signs.

Oldest Redskin Passes
Banning.—Maria Antonia Andreas Pablo, great-great-grandmother and said to have been the oldest living Mission Indian, is dead at her home on Morongo Indian Reservation, two miles south of here. She suffered a fractured leg in a fall May 4. Active and mentally alert until her accident, Maria Pablo was 104, according to census roles of the Mission Agency at Riverside.

Work Under Way on Naval Base
San Francisco.—Approximately 100 men are at work on the Alameda navy air base and work is progressing satisfactorily. Commander E. C. Seibert, in charge of construction, reported. Commander Seibert said the contractor is "making land" at the rate of 22,000 yards of fill per 24 hours, and the work is about one-eighth complete.

Indian School New WPA Project
Porterville.—An enlarged program of vocational training and other projects for young Indians at the Tule River Indian Reservation, east of here, will be provided as result of approval of a \$24,500 WPA project. The project is sponsored by the Tulare County Schools Department, under direction of the office of Indian affairs of the United States Department of the Interior.

Vote O. K. on New Prison
Los Angeles.—California's new \$3,500,000 penal plant proposed for the southern part of the State will be erected at Chino, San Bernardino county. Purchase of a 2,600-acre tract of land was voted 3-2 at a meeting of a special prison site commission in Los Angeles last week.

Bore Record Set
Los Angeles.—Establishing a new record for the second successive month, crews on the San Jacinto tunnel of the Metropolitan Aqueduct excavated 227 feet of that thirteen-mile tunnel during May, according to reports received recently by F. E. Weymouth, general manager of the Metropolitan Water District.

Memorial Voyage Started
Santa Monica.—Valiantly pointing her bow toward Point Barrow, on Alaska's stormy northern coast, a voyage of approximately 5000 miles, the thirty-eight-foot Diesel motored yacht Pandora left Santa Monica Harbor June 1. She is charged with the mission of erecting and dedicating a monument to Will Rogers and Wiley Post on the anniversary of their fatal crash. Family members and friends of the adventurous crew bade them farewell on the Santa Monica pier.

WHAT TO EAT and WHY ★ ★

C. Houston Goudiss Warns of the Dangers of Overweight

Nationally Known Food Authority Describes the Right and Wrong Methods of Reducing

By C. HOUSTON GOUDISS
6 East 39th Street, New York City.

THERE was a time when overweight was indulgently tolerated and even respected. It was believed that width and wisdom went together and that fat people had the best dispositions. Surplus poundage was regarded as an indication of wealth for it implied that one had plenty to eat and did not have to work.

The modern point of view, backed by medical science, is that overweight destroys beauty, multiplies the chances of disease and subtracts years from your life.

Most of the degenerative diseases of middle life occur more frequently in those who are overweight than in those whose weight is normal. The entire body functions at a disadvantage for the excess fat is present inside as well as outside of the body. Just as the abdomen, hips and arms are burdened with excess fat, so are the internal organs stifled with needless tissue.

Overweight Burdens the Heart
Fatty deposits increase the work of the heart, because each extra pound demands the pumping of additional blood. It has been estimated that every pound of fat requires six-tenths of a mile of blood vessels to nourish it! Thus, the individual who is 20 pounds overweight is carrying around 12 miles of excess blood vessels. Naturally, the heart must work faster and harder to pump blood through these extra miles, and it is not surprising that it is frequently overstrained.

Heart disease and high blood pressure are often associated with excess fat. So are diabetes and kidney disease. And when fat creeps around the abdominal muscles, it may interfere with normal elimination.

Life May Be Shortened
Furthermore, life insurance companies estimate that the more overweight the body becomes, the slighter the chances for longevity. All the data that have been assembled indicate that as age and weight increase, the death rate rapidly accelerates. Gross overweight may shorten life by as much as ten years.

What Should You Weigh?
It is generally held that under the age of thirty, it is advisable to weigh from five to ten pounds more than the average for one's height and age. But after thirty, a weight of ten to twenty pounds below the average is desirable. In fact, leading authorities now agree that it is an excellent plan to endeavor after thirty to maintain the normal weight for one's height at age thirty.

Reducing Methods to Avoid
If you have allowed yourself to become overweight, you should and can reduce. But you must go about it in a scientific manner. Do not put your faith in worthless or dangerous methods that either fail to reduce or may cause you to lose your health faster than you lose weight.

Never take any sort of drugs for the purpose of reducing, except under the advice of your physician. Many drugs which are said to speed up bodily activities and burn up fat may injure the heart, produce cataracts of the eyes, and

Do You Want to Learn How to Plan a Laxative Diet?

Get This Free Bulletin
Offered by C. Houston Goudiss

READERS of this newspaper are invited to write to C. Houston Goudiss, 6 East 39th Street, New York City, for a free copy of his bulletin, "Helpful Hints on Planning a Laxative Diet."

The bulletin gives concrete suggestions for combating faulty elimination through correct eating and proper habits of hygiene. It gives a list of laxative foods and contains a full week's sample menus. A postcard is sufficient to carry your request.

Are You Overweight? You can REDUCE Safely. Surely. Comfortably

Send for This Free Bulletin
Offered by C. Houston Goudiss

Readers of this newspaper are invited to write to C. Houston Goudiss, at 6 East 39th Street, New York City, for his scientific Reducing Bulletin, which shows how to reduce by the safe and sane method of counting calories.

The bulletin is complete with a chart showing the caloric value of all the commonly used foods and contains sample menus that you can use as a guide to comfortable and beautiful weight reduction.

do other serious damage. Other drugs may have a harmful effect on the kidneys.

The various fad reducing diets which women pass about among themselves are likewise dangerous, because they are usually unbalanced. They may lead to a serious type of acidosis; to nervous disorders, faulty elimination, or deficiency diseases.

Less dangerous, but wholly ineffective, are a variety of salts, soaps, pills and devices said to make fat vanish as if by magic.

It is also a fallacy to believe that rubbing, massaging or pumping will effectively take off weight.

Rational Weight Control
The one scientific method of maintaining normal weight or getting rid of a surplus is to recognize the fundamental fact that all body fat originates as surplus fuel. Thus weight control is chiefly a matter of regulating the diet so that the food intake does not exceed the energy expenditure.

Counting Calories
The person who has become markedly overweight as a result of overeating should put himself in the hands of a physician, but the maintenance of normal weight depends largely upon learning to count calories. Many people are puzzled by the word "calorie," which is a term of measurement used to measure both the fuel value of foods and the body's energy needs.

For example, a tablespoon of sugar furnishes 50 calories; a tablespoon of butter, 100 calories; one-fourth of a large head of lettuce only 12 calories.

The energy requirement for a normal adult man engaged in a sedentary occupation is from 2,200 to 2,800 calories daily; work done standing or walking requires up to 3,000 calories daily. A woman requires from 2,000 to 2,500 calories daily, depending upon her activities.

By becoming familiar with the caloric value of foods, it is possible to construct a well-balanced diet, and at the same time to cut down on fuel values so that you consume less energy foods each day than the body requires. This will force the body to burn some of its own fat for fuel and result in a safe, scientific gradual weight reduction.

I shall gladly send readers of this column a chart showing the caloric value of all the commonly used foods.

You will find that by eating 500 calories less each day than the body expends, you can reduce your weight a pound a week. And with the chart before you, you can cut out 500 calories without even missing them.

Sample Reducing Menus
In planning a reducing program, it is essential to include in each day's diet adequate amounts of the protective foods. To help you plan a balanced diet, a week's sample menus have been included in my Reducing Bulletin.

By keeping your weight down, you may have at least ten years longer in which to enjoy life. In becoming master of your fat, you will truly become master of your fate.

Secrets of Ancients Survive Attacks of Modern Science

With television soon to become a serious rival to the movies, and giant airplanes and "press-the-button" warships things which raise little comment from the average man, it is surprising that there are many secrets known to the ancients which have survived the attacks of modern science, says a writer in London Answers.

The Greeks could not weave linen or wool on anything like the scale we weave them today. But they wove them into the piliema, a form of cuirass which could not be penetrated by the sharpest dart or arrow. The secret has been lost—perhaps forever.

The Romans sank wells for water to great depths. Exactly how they did the boring we do not know. They also made glass which would bend yet not break. This would be quite useful today.

The beautiful purple dye, known of old, has eluded the dye-makers of today. And modern builders can make nothing of the strong and durable cement used by the Greeks and the Romans in their

walls. This cement was stronger and harder than the stone itself.

The knowledge possessed by the ancient Egyptians was very extensive. They had a method of dressing stone to withstand the ravages of time and weather. They also perfected the art of embalming. Probes, forceps, and other surgical instruments have been found in Egypt. For what purpose they were used we will never know.

That secret, along with many others, passed away with the destruction of the famous library at Alexandria in the Fifth century. The loss of the knowledge contained in that library was a blow to civilization.

Reading and Thinking

Reading furnishes the mind only with materials of knowledge; it is thinking makes what we read ours. So far as we apprehend and see the connection of ideas, so far it is ours; without that it is so much loose matter floating in our brain.—Locke.

Must Books Be Read?

The collector of books need not fear the challenge that is sure to be made, sooner or later, by his skeptical acquaintances: "Have you read them all?" The first idea he ought to get out of his head is that he must only buy books for immediate reading.

"The charm of a library," said that devout book lover, the late Arnold Bennett, "is seriously impaired when one has read the whole or nearly the whole of its contents."

Bennett confessed that he had hundreds of books he had never opened, and which, perhaps, he never would open. But he would not part with them. He knew they were good, and as he gazed on them, he said to them, "Some day, if chance favors, your turn will come. Be patient!"—Liverpool Post.

Best Thoughts

Try to care about something in this vast world besides the gratification of small selfish desires. Try to care for what is best in thought and action—something that is good apart from the accidents of your own lot. Look on other lives besides your own. See what their troubles are, and how they are borne.—George Eliot.

WHEN LIFE DEPENDS ON TIRE SAFETY

IT'S ALWAYS Firestone

FOR 19 CONSECUTIVE YEARS THE
WINNERS OF THE INDIANAPOLIS 500-MILE
RACE HAVE PROTECTED THEIR LIVES WITH
FIRESTONE GUM-DIPPED TIRES

THEY said it couldn't be done — that tires could not withstand the torture of the new high speeds. Yet Floyd Roberts set a new record, at this year's Indianapolis Race, averaging 117.2 miles an hour for the 500 miles on Firestone Gum-Dipped Tires.

With the sun-baked brick of the straight-away and the granite-hard surface of the turns pulling and grinding at their tires, 33 daring drivers, every one on Firestone Tires, waged a thrilling battle for gold and glory. Never before have tires been called upon to take such punishment. Never in all the history of the motor car has tire safety been put to such a gruelling test. Yet not one tire failed — not one single cord loosened — because Gum-Dipping, that famous Firestone patented process saturates and coats every cotton fiber in every cord in every ply with liquid rubber counteracting the tire-destroying internal friction and heat that ordinarily cause blowouts.

Why risk your life and the lives of others on unsafe tires? Join the Firestone SAVE A LIFE Campaign today by equipping your car with Firestone Triple-Safe Tires — the only tires made that are safety-proved on the speedways for your protection on the highways.

ELECTRIC FENCES

Wonderful new controllers designed for great effectiveness and improved safety. Each unit electrifies ten miles of fence. Priced from \$12 up to \$24.65 postpaid. Battery or power operated. Salesmen Wanted. INTERNATIONAL ELECTRIC FENCE CO., Portland, Or.

Orange Tree To Tour East

Anaheim.—A living orange tree dotted with 600 fruit is en route to New York by truck. It is an idea of J. Stubbs who is making the trip with a relief driver. He wants to show the country how Southern California grows oranges.

State To Buy Serum

San Francisco.—An appropriation of \$10,000 for the purchase of anti-pneumonia serum to be distributed free to California physicians was announced by Dr. W. M. Dickie, director of the State department of public health. The funds will be supplied from the department's social security allocation. Plans for a survey by the federal public health service to determine types of pneumonia occurring most frequently in California also were discussed by Doctor Dickie. He said the survey will be started July 1st in San Francisco.

Road Now Open Around Tahoe

Reno.—The Emerald Bay section of the Lake Tahoe highway was opened to travel last week and the lake can now be completely circled.

Giant Organ Given Tryout

Claremont.—Pomona College's giant organ, one of the three largest instruments in the West, was used May 22 for the first time for a student recital by James McNabb, talented young South Pasadena Junior. His program demonstrated the varied range of the new organ, which was installed at a cost of \$60,000. The organ has 5936 pipes varying in size from three-quarters of an inch in length to thirty-two feet.

CHAPTER VIII—Continued

"No matter. I am free." And she was free! Her own plane, her own life! "So, now," he was saying gravely, "you will fly." "Now I will fly." "That is good."

They met the car from Danavale and Sarah Lynn jumped out and ran to explain. "Oh, you've brought Lightning!"

"We had to," Lynn Dana told her. "She was having refined hysterics. Better take her along. I'll telephone your mother." They waited, watching contentedly, until the fliers were out of sight.

Lightning crouched at Sarah Lynn's feet, making small sounds. "Mountains I like; large trees I like," Gunnar said, coming out of one silence and going into another.

She nodded without speaking, and the companionable stillness held, mile on mounting mile.

Redwoods were outlined against the heavy blue sky.

"So, now you fly," Gunnar said again, seriously. "So, now, also, we are friends?"

They were now friends, she told him with a gravity matching his own, and comfortable cloaks of silence enveloped them again.

But a sound of pure astonishment escaped him at sight of the first forest giant.

"But—I have never believed it could be so!"

"Wait!" she pledged him happily. "That is only the prelude to the great ones."

He settled back in his seat with a long, relaxing sigh of contentment. "Large trees I like," he said, "and mountains and the sea, and songs and books; most I like the sky. Also I like a friend."

Sarah Lynn leaned over Lightning and gave her a hug. "You have one good American friend already. My Uncle Lynn says Conrad Jordan is the best possible person in this country for you to know. He says he's everything—a fine flier, a scholar, a sportsman."

"Also, he makes good music."

"Oh? I didn't know that."

"But yes. At his lodge on the Lake of Tahoe, many nights I have sat by the fire, wind and rain sounding, to listen to his deep thoughts from the piano." He gave generous gangway to a truck. "You shall hear. I will bring you there one day."

She did not answer, unless, indeed, he heard the thumping beat of her heart. She thought he must. It was a relief to reach the park and get out of the car, and to watch his face as they went walking into the presence of the Big Trees.

The effect upon him was satisfying. He would never be ecstatic or explosive, she knew, but all the appreciation and emotion which others expelled went into the quality of his looking, his silence. He stepped softly, as if he found himself in a cathedral, and his face, under the thatch of unsalted butter-colored hair, might have been the earnest countenance of a Boy Scout bent upon good deeds.

Gunnar was looking only at the trees, so Sarah Lynn was able to look at him. He seemed younger, somehow; his austerity was giving way to a little-boy-like wonder, with an interlining of wistfulness.

"So, now, you fly," he began as before. "So, now, we are friends."

"Yes," she told him contentedly. "Friends," he repeated, but there was clearly more on his mind. "Fliers," he stated with authority, "shall not marry."

"No?"

"No."

"No," she agreed docilely.

Then they walked on, and he was quite evidently relieved at having settled an important matter swiftly and finally. She would be a flier, and they would be friends, and fliers did not marry.

"No?"

"No."

"No," she agreed docilely.

Then they walked on, and he was quite evidently relieved at having settled an important matter swiftly and finally. She would be a flier, and they would be friends, and fliers did not marry.

"No?"

"No."

"No," she agreed docilely.

chine, Lynn and me, and we're paying a young feller to teach her to run it. Didn't I tell you, first time ever I laid eyes on the young-one? I knew right off she was one of the dark ones."

"Then she went close and peered up at her and shook a parchment finger in her face. 'And you listen to me, Addie, for it's the gospel truth. She's more my child than she is yours, for all you borne her and there's worse than seventy years between us!'"

Sarah Lynn was sincerely sorry for her mother's martyrdom, but life contained for her now only two shining and splendid facts—flying and Gunnar Thorwald; when other subjects came into her mind it was like pouring fluids into an already brimming bowl; they simply ran over and off.

Whenever she flew with Gunnar Thorwald, Sarah Lynn sat in silence watching his sure hands, looking,

and bread, honey," he ordered briefly.

The woman slammed down their plates and cups and Gunnar was buttering a thick slice of bread.

His taxi-driver had risen and slouched into the back room, and now a little man in an enveloping apron came out. He had scared eyes and an unimportant chin, and he was staring at them. He spoke over his shoulder. "Honest? You ain't stringin' me, Nick?"

The woman said something to him and he popped out of sight like a gopher into its hole, and the taxi-driver came back, grinning.

It was the usual thing to be recognized. Almost everywhere they went someone knew Gunnar Thorwald at once, and then there would be nudges and whispers.

Other customers came in. The woman served them truculently. Her husband came edging out of the kitchen again to stare at Gunnar and Sarah Lynn. He had a

ing at the counter, and stuck his head into the steam and stench.

"So it interests you—flying?"

"Interests—say, boy! I read every scrap I can lay hands on, and I see every movie that's got flying in it, and when I stand here, hashin' and hear 'em go by in the sky—" he stopped, gulping, his Adam's apple moving convulsively in his stringy throat.

The wife came back with a pile of soiled plates and pushed rudely past the flier. "Pop, you tend to business! Tea-bone and country fry!"

The Norwegian looked through and beyond her. "Yourself would wish to fly?"

The little man put down a long pronged fork and clasped small pudgy hands with broken and black-rimmed nails. "Just once—before I die—I wouldn't ast nothin' more. I wouldn't—"

"Come, then!"

It was all done in a flash. The aviator's arm which seemed to lift

When they reached the field Gunnar placed a friendly arm about the man. "Still game?" he asked.

learning, remembering, and stored up questions for the earth.

"I have the wish to see your Golden Gate in sunset," he said one day.

They were driving to the landing-field. "Gunnar, I want to come down in a parachute," Sarah Lynn said.

"Yes. But not yet. There is for you much more learning."

"Of course. After I can really fly. It must be the most satisfying thing in the world and not so terribly hard. Just wait and count ten before you pull the string."

"That is, you think, so simple?"

She shivered happily. "It must be the most gloriously terrifying thing—just bailing out into the blue beyond with a silly trick parasol over you! But I want to do it, Gunnar."

He nodded. "You shall do it. That I promise. From my plane. But—when I say you are ready."

"Yes." She settled back in her seat, entirely content.

Lynn Dana had written Sally Ann the night before: "As to your question—I don't know. Our queer dark one, beyond all possibility of a doubt, quite literally worships the air he flies in. As for the lad—he approves her utterly for her courage and cleverness, but he's flint-hard and bat-blind. If her heart's on her sleeve, he doesn't see it, and she has a nice young dignity and reticence."

Something did not quite suit Gunnar in Hermod's rhythm as they flew up the valley, and they came down at Oakland before crossing the bay. It needed only a minor adjustment, but would take a little time.

"Tea, while we wait," the ace said. He hailed a taxi and put her in it, and they drove a couple of blocks. "Here! This will do!"

It was a shabby little eating-house with a menu written in chalk on a blackboard at the door.

"Wait!" Gunnar directed the taxi-driver.

"Sure," he said amiably. "Comin' in myself. 'Lo, Lena!' he greeted a big-busted woman with dyed hair. 'How's tricks?' He sat down in the last seat before the counter which was close to the kitchen. The fliers sat near the door. "Tea

droll little pot-bellied figure and pipe-stem legs, and he stood nervously rubbing his hands over his dirty apron.

"I just gott ast you," he began in a hissing whisper. "Nick, he's a great one to kid you along. On the level, are you Gunnar Thorwald and—and that girl?"

They were, they told him, Sarah Lynn gently, the Norwegian ace with a sudden friendliness which surprised her.

The wife wheeled about, snarling. "You get back where you belong!"

She took an order. "Stack a' wheats!" "Ham and!"

Without a word he scuttled back into his unsavory domain.

Gunnar finished his bread and honey and drank off his tea. His eyes were narrowed to a gleaming blue slit. Then he stood up and walked back through the stuffy room, past the hunched figures feed-

him bodily out of his fetid trench and propel him through the tiny restaurant and into the taxi, the driver, wiping his mouth, grinning, running after, jumping into his seat, Sarah Lynn, delighted, aghast, following Gunnar, the staring customers, the woman emitting shrill staccato cries—

"Pop! Pop! You come back here! You crazy? Want to break your fool neck? Pop!" She began to whimper and storn. "You let loose a' him, Mister! I'll call a cop! You can't kidnap—"

They were rattling down the street, the little man wedged in between them, the unhealthy pallor of his face suffused with scarlet excitement.

When they reached the field Gunnar placed a friendly arm about the man. "Still game?" he asked. To which the fellow, too overcome to talk, nodded eagerly.

(TO BE CONTINUED)

Soil Treatment Kills Japanese Beetle Grubs That Feed on Roots of Vegetation

When Japanese beetles, the offspring of those that slipped unobtrusively into the United States some time before 1916 on nursery stock from the Far East, were first discovered in New Jersey, entomologists could suggest no effective way to stop their spread. In their native home, various parasites and predators keep these beetles from becoming a serious economic pest but those that migrated here brought no natural enemies with them. Consequently they multiplied rapidly.

Now they infest continuously about 11,400 square miles, mostly in New Jersey but running into New York, Pennsylvania, Delaware and Maryland. Isolated colonies have sprung up elsewhere along the Atlantic seaboard. Nothing can be done to stop the natural spread of the Japanese beetle here. Each year it extends its territory a few miles on every front, notes a writer in the Detroit Free Press.

The only effective control measure for the Japanese beetle, treating infested soil with lead arsenate, is too expensive for use over a large area. In small, isolated areas of

infestation, it is a cheap safeguard against a spreading infestation that would soon become very costly.

Soil treatment kills the beetle grubs that, just below the surface, feed on the roots of grass and other vegetation. Unsightly brown spots in lawns and on golf courses in the East are evidence of this feeding. Adult beetles feed on about 260 different plants. They live mainly on foliage and the upper and outer parts of plants exposed to bright sunlight.

Flying Library Serves Isles

Supplying reading matter to the residents of Wake, Midway and other islands along the Pacific air line has been simplified by inauguration of a flying library service. When the Pan American clipper planes take off from Honolulu, packages of books are on board, each consigned to one of the islands. The Honolulu public library is in charge of the service. The books are kept in circulation by moving them from one island to another until the entire route has been covered. — Popular Mechanics Magazine.

Make Lace Bolero In Jiffy-Crochet

Pattern 1745.

Dress-up your daytime or summer evening dresses with this dainty lace bolero crocheted in two strands of string. Pattern 1745 contains directions for making bolero; illustrations of it and of stitches; materials required.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle, Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Please write your name, address and pattern number plainly.

Tallest Smokestack

The Anaconda Copper Co., Anaconda, Mont., has the tallest smoke-stack in the world, it being 585 feet tall with a 60-foot internal diameter at the base, a capacity for generating 225,000 horse power and capacity for burning 1,25,790 pounds of coal an hour.

NERVOUS?

Do you feel so nervous you want to scream? Are you cross and irritable? Do you scold those dearest to you? If your nerves are on edge, try LYDIA E. PINKHAM'S VEGETABLE COMPOUND. It often helps Nature calm quivering nerves. For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure. Make a note NOW to get a bottle of world-famous Pinkham's Compound today WITH-OUT FAIL from your druggist—more than a million women have written in letters reporting benefit. Why not try LYDIA E. PINKHAM'S VEGETABLE COMPOUND?

Nature's Strength

The rock that resists a crowbar gives way to the roots of the tender plant.

DOG FOOD "BLACK LEAF 40" Keeps Dogs Away from Evergreens, Shrubs etc. 1938 Use 1 1/2 Teaspoonful per Gallon of Spray.

DAISY FLY KILLER One beautiful 5x7 Artistic enlargement free with each roll of Kodak film developed and printed (8 prints guaranteed). Per roll (send coin) only .25c each. Reprints of old negatives. 35c each. COMET FILM CO. P. O. Box 110 -- Portland, Oregon

HOTEL ROOSEVELT SAN FRANCISCO'S NEW FINE HOTEL. Every room with tub and shower \$1.50 to \$2.50. Jones at Eddy. Garage under same roof.

Sentinels of Health Don't Neglect Them! Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—life itself—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all worn out.

Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance. The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use Doan's Pills. They have had more than forty years of public approval. Are endorsed the country over. Insist on Doan's. Sold at all drug stores.

DOAN'S PILLS WNU-12 24-38

MAGIC CARPET It doesn't matter what you're thinking of buying—a bar-pin or a baby grand, a new suit for Junior or a set of dining-room furniture—the best place to start your shopping tour is in an easy-chair with an open newspaper.

The turn of a page will carry you as swiftly as the magic carpet of the Arabian Nights from one end of the shopping district to the other. You can rely on modern advertising as a guide to good values, you can compare prices and styles and make your choice just as though you were standing in a store. Make a habit of reading the advertisements in this paper every week. They can save you time, energy and money.

BLESSED EVENT

IN A YEAR when the long fingers of the nation's tax collectors will dip into American pockets for a haul of thirteen and one-half billion dollars, it's good, almost great, news to report a drop in the tax tides.

On July 1 the treasury department will stop extracting its pound of tax pence on tubes of toothpaste and cakes of soap, which have netted the government a tidy 5 per cent cut. Also headed for the graveyard are the 3 per cent tax on furs, a 5 per cent tax on phonograph records, a 10 per cent tax on cameras and sporting goods.

Henceforth chewing gum will no longer find itself stuck with a 2 per cent tax. Nor will wooden matches have any further cause to get burnt up over friction with the government's levy of 2 cents per thousand on them.

What difference will this make to us? Possibly very little. These are hidden taxes. We didn't notice them when they were here. We shall probably not notice it when they are gone—one example where the consumer has an edge over the enterprisers who are smack on the firing line.

They not only feel the sharp impact of "nuisance" taxes, they have also become the target for all manner of confiscatory measures, like the proposed Patman destruction tax on the unified retail outlets, a deadly living-costs stimulator whose effects would be felt in the pocketbooks of every consumer in the land.

In contrast, these soon-to-be abandoned hidden taxes have been comparatively painless. And that, we aver, is a downright shame! What a jubilee America might stage on July 1 if all of us felt taxes lightening, purses fattening, and saw pennies staging a home-coming in the tax-punctured holes of our pocketbooks. A blessed event, that would be!

AN ANSWER TO IL DUCE

IN THE MANNER and mood of a bad little boy pointing out a spot on his father's tie when the parent catches him stealing a cake, Benito Mussolini has just had his bit of fun scattering seeds of scorn on America's kidnap record. In a vociferous denunciation of Cordell Hull's speech urging the humanizing of war, Il Duce's official newspaper went on record with, "Let America humanize her own internal peace before turning to the wars of others. Guarding the safety of children in their homes is A B C for peoples who aspire to be civilized."

America may well feel the sadness of shame when Il Duce's finger is pointed at the Levine and Cash kidnappings, but what Mussolini fails to consider is the difference between a national mentality and a criminal mutation from a normal morality. Secretary Hull condemned a national morality dedicated to war, imperialism, and mass murder, a morality which daily schools a nation into a mass mentality shaped to the needs of war.

This war morality of Italy, unlike the kidnappings of the United States, is in the minds of all, not in the minds of a few warped criminals. America condemns those individuals whose minds conceived the Levine and Cash kidnappings. America can also condemn those individuals whose minds conceive a nation dedicated to ruthless war.

"Guarding children in their homes," says Mussolini, "is a sign of a civilized state." There are those of us who wonder if putting guns in those tiny hands, and gas-masks on their faces, and war thoughts in their minds is a sign of a civilized state.

BUSINESS AS USUAL

COME DEPRESSION or recession, rainfall or windfall, America's old reliable, the family car, purrs steadily on as steadfastly as time itself.

And nowhere has the pulsing of its motors been more sturdily insistent than in California. The just-released findings of the U. S. Bureau of Public Roads indicate that though Wall Street may cascade, and tycoons may view with alarm, the gasoline buggy, like a thorough-grained optimist, seems to care not a whit.

Its ever mounting registration figures and its upward-climbing gasoline consumption show that here, for one, is something that can take a slump in its stride with the greatest of ease.

Drape it in holiday bunting, give it a salute! The family car is a round-the-year worker whose motto, like Old Faithful's, always reads: "Business as usual!"

MORE MENTAL MUSH

THE WE'RE-ALL-GOING-CRAZY boys are at it again. With clinical charts and measurements, Dr. Theophile Raphael recently proved to the American Psychiatric association that an alarming number of paranoiacs, schizophreniacs, and maniac-depressives are running loose in our colleges.

But the doctor has a solution. Tests, examinations, probings, and more tests are the answer. All we have to do is put all our young men and women through the charnal house of mental investigation. Then, with the chaff separated from the sane, our colleges will again be safe for nice normal boys and girls.

The doctor has his facts, based upon the laboratory reaction of 4779 guinea-pigs at the University of Michigan, but he seems to forget the rules and regulations are out of place in the great untracked mysteries of the mind. Can a series of tests and tabulations label one youthful mind as normal and another as worthless? Perhaps great music, great literature, or great thoughts will come from one of those minds. Who can say from which one?

At that, the doctor is probably right in one respect. Put our boys and girls through the mill of continued mental probing and one thing is certain, the doctor will have his fill of future mental cases.

JUST TWO OF US

HAROLD KNUDSEN, a Chicago statistician with a mind for facts and figures, has recently added up some figures to produce some interesting facts. Suppose, said Knudsen, we start with the population of the United States and subtract all the non-working groups! What would the result be?

From the total population—122 millions—subtract persons eligible for old age pensions—15 millions; those ineligible to work under child labor laws—20 millions; persons on city, state, and federal pay-rolls—22 millions; housewives—40 millions; totally disabled and students—11 millions; and a rough estimate of the total unemployed—13,999,998. How many does that leave to do the actual work? The answer is: 2!

Knudsen concluded his figures with this note: "This leaves the President and myself to do all the work in the country. Most of the time he's away fishing—and I'm getting darn sick of doing it all."

A GIANT OF THE AIR

WITH THE ROAR of mighty metal engines man's newest monster of the skies, the Douglas sky-liner, daily zooms through the air of southern California on an extended series of test flights. Weighing twenty-six tons, able to carry forty-two passengers, powered by four giant engines, the new queen of the skies takes her place in the ranks of great American achievements.

American men and materials can produce great things. American genius knows how to lead, American labor knows how to produce, American merchants know how to make and sell. America is a nation that knows how to do things and how to do them well. America can move ahead. The time is NOW!

REACTIONARIES

A PAINTER'S UNION in San Francisco has been partially successful in seeking to eliminate the use of spray guns in painting houses and office buildings, and restoring the old handbrush method.

It is understandable that unions should seek jobs for their members. Experience and common-sense, however, do not prescribe a method which turns its back on modern technological implements in favor of old-fashioned weapons. By adopting this policy—and there is no reason why organized labor in California should not attempt to restore antiquated techniques in other trades—the unions are forgetting their history lessons.

Fifty years ago, when the linotype made its advent, there were less than 70,000 printers in this country. This new machine set up as much type in one hour as five or six men, but instead of throwing them out of work it made new jobs. There are now more than 180,000 printers in America—a much greater increase than our population growth would account for.

And so it has been with all our modern industries—rubber manufacturing, automobiles, radio, machinery, textiles, aircraft. Momentarily the machine may displace men, but it speedily creates new jobs.

By trying to restore the old brushwork method, it is the unions, not the employers, who lay themselves open to the charge of "reactionary!"

For Assembly

M. G. Del Mutolo
M. G. Del Mutolo announces his candidacy for assemblyman from the Thirty-first district, comprising the southern half of Santa Clara county.

Mr. Del Mutolo has resided in the district for more than twenty years, and at the present time lives on Glen Una Way in the Willow Glen section of San Jose with his wife and daughter.

He has practiced law in San Jose for the past twelve years and has long been a student of the state government, and has well-formed ideas as to what should be done by the legislature in order to achieve economy in government, curtailment of waste, reduction in taxes, and abolishment of unnecessary boards and commissions, which number now about four hundred in the state.

He is opposed to the single tax and favors further sales tax exemptions on necessary commodities including clothing, farm implements and mechanics' tools of trade.

He believes that we should maintain and promote the high standard of education characteristic of this state.

Rev. Edwin Bowling left Tuesday for Stockton to attend the Methodist annual conference, which is held at the College of the Pacific, June 14 to 20. He will return Monday or Tuesday of next week. The pulpit of the Campbell Methodist church will be filled next Sunday by the Rev. J. M. Kerr of Toronto, Canada.

Shells Used to Store Water

Among the most useful things on the Great Barrier reef, Australia, may be named the bailer shell. It grows to such a size that shells which may contain a gallon of water are quite common. They are used by boatmen as bailers for their craft and for the storage of fresh water when only a gallon or so is required. The Aborigines use them for many purposes, chief of which are saucepans, buckets, bailers for their canoes, and safe deposits (or dilly-bags) for the storage of personal property. The flesh of the bailer shell, though tough, is eaten by the natives. The bailer contains more flesh per area of shell than any other shell on the reef.

I SHALL NOT PASS AGAIN

I shall not pass this way again,
But far beyond earth's where and when,
May I look back along a road
Where on both sides good seed I sowed.

I shall not pass this way again.
May wisdom guide my tongue and pen,
And love be mine that so I may
Plant roses all along the way.

I shall not pass this way again.
May I be courteous to men—
Faithful to friend, true to my God—
A fragrance on the path I trod.

ANON.

CONGREGATIONAL CHURCH NOTES

J. H. Bennett, Pastor

Sunday morning the 11 o'clock service will be conducted entirely by Dennis Bennett, in the absence of Rev. J. H. Bennett, who will be on vacation.

There will be a meeting of the California Pension Plan club at the Congregational church Monday evening at 7:30. Speakers will be there to explain the plan. Everybody is welcome.

Miss Daisy Pannell, who is having her annual vacation from Field's store, with her sister, Miss Maud Pannell, is spending this week in Yosemite park. As this is their first visit there they are having a doubly delightful time.

Mr. and Mrs. R. H. Hyde spent last week-end in Mendocino City, guests of Mr. and Mrs. William Mason. Tomorrow they will take their son, Homer, to Yosemite park where he will be employed during the summer at Camp Curry, which will be his third summer at this popular resort.

"Picinin," dog owned by Bartelo Speranza, Southern Pacific section foreman at Cape Horn, lonely spot in the high Sierra of California, five miles east of Colfax, meets all passenger trains to carry home reading matter thrown off by friendly trainmen for Speranza and his wife. Photo shows brakeman Frank G. Bluett tossing roll of newspaper to the dog.

GARDEN ENTRANCE TO STATE BUILDING

Presented today by the California State Commission—Florence M. McAuliffe, Chairman, and Charles H. Purcell, Executive Officer—is the above artist's conception of the Garden Entrance to the California State Building, to be constructed on Treasure Island for the 1939 Golden Gate International Exposition. Spacious and attractive, the large court will afford an impressive view of various County group buildings.

The FARMERS CORNER

by RALPH H. TAYLOR

Executive Secretary
Agricultural Council
of California

Budget Time is the time to protest high taxes—not next fall when tax bills become due and payable.

And budget time, in most California counties, is during July and August, although in some sections the preliminary hearings start this month.

The warning gong is sounded early for the need for public vigilance this year is particularly great.

California, during 1937, with its terrific relief load, swollen by a continuous influx of refugees from other states—with increased pension costs, increased general government costs and increases of every conceivable nature—had a total tax bill nearly three-quarters of a billion dollars.

The per capita tax, highest in the state's history, reached the sum of \$114 for every man, woman and child, with many families contributing—directly and indirectly, to federal, state and local governments—one-third of all their earnings!

Farmers, home-owners, business men and common property taxpayers of all classes have urgent need this year to sit in on budget hearings of their board of supervisors and keep strict tab on proposed expenditures. For taxpayers and the dependents of government are bound to be present, with demands for increased appropriations, and public officials who recognize the need for retrenchment will need vigorous support from those who foot the bills.

On the favorable side of the ledger, it should be noted that there is rapidly increasing evidence of a public revolt against free-handed spending and skyrocketing tax rates. But hit-or-miss protests are not enough; the protests must be made to the public officers charged with budget approval and fixing of tax rates.

Indicative of the fact that tax increases can be checked—if public support is forthcoming for the movement—is the recent action of the Los Angeles County Board of Supervisors in adopting a resolution declaring that "No additions will be made to the budget by the Board except those by demand of the taxpayers at public hearings."

In announcing its economy program, the board called attention to the fact that "budget requests

WELL THANK GOODNESS THOSE POTTS PEOPLE HAVE GONE HOME.

STILL, THEY LEFT EVERY THING IN PRETTY FAIR CONDITION—AND IT'S ALL CLEANED UP.

THEY FORGOT THIS WONDERFUL TABLE CLOTH, BUT IT'S THE LAST TIME THEY'LL SEE IT; POSSESSIONS NINE POINTS OF THE LAW THAT'S MY MOTTO.

HIDIN' A GREASE SPOT ON THE WALL! IT JUST GOES TO SHOW YA CAN'T TRUST PEOPLE.

Urged to Consume More Dairy Stuff To Vacation In Honolulu

Following Governor Merriam's proclamation of June 1 urging all Californians to drink more milk and use more milk products, the Dairy Producers of Northern California met in San Francisco and completed a stabilization committee. This committee will cooperate with all distributors and retailers of milk in efforts to increase California's consumption of milk during the next 30 days. More than 60,000 dairy farmers of the state expect to benefit by the milk promotion campaign during the season when the milk supply reaches the peak in both quantity and quality. The program of the stabilization committee includes the featuring of milk as a popular beverage at soda fountains, restaurants and hotels and in all places where food is dispensed. The campaign will be a national one, and the committee has pledged the cooperation of 35,000 chain food stores, 3,300 chain variety stores and 3,000 chain drug stores.

"The American consumer is intensely interested at the present time in securing maximum values in food at minimum cost. "Milk provides almost every type of nourishment that the human body needs—supplying 46 different food substances in all. If the housewife bought all the foods contained in a quart of milk separately at a chemist's, she would pay more than \$44.00 for them."

Mrs. Laura M. Keesling is in San Diego where she was called because of illness in her sister's family.

Miss Catherine Duggan of Petaluma is spending a week in Campbell, the guest of Mr. and Mrs. W. H. Van Dyke.

Cause of Petrification
Petrification is caused by the infiltration of water containing dissolved mineral matter, such as silica, calcium carbide or others. Particle by particle the mineral replaces the organic material, sometimes with the original structure retained. The best results occur where silica has been the invading mineral matter, and splendid specimens of silicified wood are often seen.

How Mexicans Store Corn
Indians of southern Mexico have a unique bin for storing shelled corn against weather and the depredations of the harvester ant. It is built in the shape of a cup and saucer, with a thatched roof, and the saucer part is filled with water.

Anticipating a delightful months vacation, Mr. and Mrs. William N. Lloyd with their daughters Geraldine and Georgene will sail tomorrow from San Francisco aboard the S. S. Matsonia for Honolulu.

Last week Mrs. Lloyd was complimented with a bon voyage tea given by Mrs. Ralph S. Shaefer at her home in San Jose.

Tests Prove the Power of Food

By C. ROUSTON GOUDISS

MANKIND owes many things to the animals which have been used as test subjects in laboratories all over the world. As doctors and scientists have waged their war against disease, as they have made great strides forward in the study of foods and nutrition, they have carried on many of their experiments with rats.

The rats pictured here dramatically illustrate the power of food to influence growth. Although these two rats are exactly the same age,

the weight of one is twice that of his brother. Where one animal is puny and underdeveloped, the second is fat and sleek and full of vitality.

What has produced such a difference in weight and general physical well-being? Merely a slight difference in diet. The two rats have lived under identically the same conditions, but the smaller animal on the left has received food lacking in sufficient vitamins, while the other rat has been fed the same diet, reinforced with vitamins.

If a well-balanced food ration is vital to the health of animals, how much more vital it must be for human beings. Surely the lesson is plain to see. If a mother wants her children to thrive she must feed them adequately. The child who is receiving a diet lacking in vitamins has no chance to grow and develop properly. Nor will the adult on a deficient diet attain or maintain optimum health.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—France is beginning to think she has another Clemenceau in Premier Daladier, and she still has Marshal Philippe Petain, one of the few survivors of the great generals of the World war.

Two or three years ago, General Petain was counseling peace and conciliation with Germany. Now he warns the French people of their "serious situation in Europe," and urges them to consider realities.

It is quite possible that rope-skipping is mainly accountable for General Petain being alive, trim, fit and active at eighty-two. He is an inveterate rope-skipper, ejected from his apartment in 1914, because he jarred the plaster from the walls. This writer's record as to that goes only to 1934, but, in that year, he was still skipping diligently. Joffre, Foch and Maginot, among the French, Von Mackensen, Ludendorff and Hindenburg among the Germans—non-skippers—all have passed, but Marshal Petain lives on, venerated by his countrymen.

It was he who said, "They shall not pass"—on February 5, 1916, to be exact. He was the savior of Verdun, and, in this connection, a deft historian might discover that rope-skipping saved France. The general spent a solid week in an Automitrailleuse without sleep, and the London Daily News commented at the time that no man who was not in perfect physical condition could have survived such ordeals. It was suggested that his energy and endurance had turned the tide of war.

He was born Henri Philippe Benoni Omer Joseph Petain, the son of a baker in Couchy a la Tour.

Man Mountain Dean, the wrestler, running for the legislature in Georgia, is after only one seat, but he will need three or four if he is elected. In retirement on his farm, near Norcross, he still weighs 317 pounds. It is a unique contest for him, with no chance for his running broad-jump attack, in which he hurls his body against his opponent.

His career seems to have been mostly his wife's idea. Born Frank Leavitt, in New York, known as the "Hell's Kitchen Hillbilly," he did a hitch in the army and thereafter engaged in some desultory wrestling and mauling as a Soldier Leavitt. Nothing much came of it, and he began placidly taking on weight as traffic cop in Miami Fla. Doris Dean married him and began prodding his lagging ambition.

He started grappling again, in Bostin in 1933, with fame still eluding his half-nelson, when a German promoter took him on a tour of the Rhineland. This was more successful, and brought him to the attention of Alexandre Korda, who needed a double for Charles Laughton as Henry VIII in the wrestling scene. Thus came the famous whiskers, an important detail of his wife's clever showmanship in the build-up of the Man Mountain. It was she who persuaded him to take the name Dean and who managed the histrionics which made him a fabulous creature. He was born in West Forty-third street in 1891, weighing 16½ pounds.

GEORGE E. Q. JOHNSON, the slight, self-effacing, bespectacled man who sent Al Capone to Alcatraz, is devoting his life to social betterment. He wants to make cities less fertile soil for crime, and to that end, would flush city and country children back and forth, interchangeably, to the benefit of each, he believes, and the nurture of good behavior.

It was as United States attorney that he deftly enmeshed Capone in a silken spider-web of evidence, laboriously gathered and spun. The next year, Herbert Hoover made him a federal judge, but he stayed on the bench only a year and then went back to his law practice.

He broke the gangs in Chicago. His story of how he snared Capone, told before the senate judiciary committee, with its tales of trapdoors and secret panels, was Grade A melodrama, but he didn't make it sound that way. He is a modest man, with no instincts of showmanship.

Signs of Commerce

Gone is the day when every trade, every guild had its time honored insignia of profession. But a few such emblems still persist in out-of-the-way places. Once every fur store placed a stuffed bear out front, often scaring passing children half to death. A more picturesque sign by far was the wooden Indian who advertised a cigar store. Both of these symbols have gone out of favor but some are destined to retain their popularity. Barber shops will always depend on the red and white striped pole and the jeweler will always hang a huge clock outside his door. So, also, will blacksmiths continue to hang a horseshoe above the entrance way.

The druggist's mixing bowl, still frequently used, has associated with it the faint aroma of professionalism that will always be present in drug stores. A less symbolic—and more practical—sign is that of the chiropodist. He works with feet, so why not hang out a giant foot?

Modern advertising men "outlawed" such symbols as the above shoe repairing sign, but no more picturesque substitute has ever been found. In an age of electric signs, the quiet professional symbol still bears a hallmark of quality.

You don't need to read it... a glance tells the story!

HOW TO SEW

by Ruth Wyeth Spears

Woven Fillet for Bags and Purses.

EITHER crochet cotton or wool yarn in two or more colors may be used for a knitting bag or purses of woven fillet crochet. The foundation is made in the lightest color. The knitting bag in the sketch is white fillet with navy blue threads woven through, as shown. The zipper purse and vanity pouch are ecru with carmine and Delft blue woven stripes. The plain spaces between the stripes are made by weaving through the fillet mesh with matching thread. To start the fillet foundation, make a chain the length of your bag, then chain 5 more, turn, and make a double crochet in the 6th stitch from the hook. Chain 2, skip 2 and make a double crochet in next stitch. Repeat to end of row, then chain 5 and turn. *Make a double crochet in the top of the

last double crochet. Chain 2. Continue across the row, then chain 5 and turn. Repeat from * until you have enough of the fillet mesh to make your bag or purse. The weaving is done with double thread and a large blunt needle. Work across and then back through each row of the fillet mesh as shown. When a new weaving thread is started, hide the ends in the edge of the crochet.

NOTE: Mrs. Spears' latest book gives complete directions for making many other things for yourself and to use as gifts. It also fully illustrates ninety embroidery stitches with interesting variations. You will use these again and again for reference. Ask for Book 2, enclosing 25 cents (coins preferred). Address Mrs. Spears, 210 S. Desplains St., Chicago, Ill.

AROUND the HOUSE Items of Interest to the Housewife

Line the Clothes Basket.—Clothes baskets can be kept clean by lining them with washable material, such as oilcloth, muslin, or heavy paper may be used.

Outdoor Fireplace.—Backyard fireplaces are easily constructed and provide a center for family recreation during summer months; steak roasts, corn roasts, and marshmallow toasts are only a few of the many reasons for building one.

Soft Pillows.—One housewife washes all the discarded silken articles of the household, cuts

them into tiny pieces and uses them to fill pillows. They are very soft and fluffy, besides costing nothing.

Mealy Baked Potatoes.—To make baked potatoes dry and mealy, when they are tender put a fork at least twice into each potato to let the steam escape.

Pick Up Sharp Objects.—A vacuum cleaner should not pick up pins, broken glass, tacks or other sharp metal pieces, for they may poke holes in the dust bag, or chip or throw out of balance the fan blades.

For Gleaming Bright Teeth Use Pepsodent with IRIUM

Irium contained in BOTH Pepsodent Tooth Paste and Pepsodent Tooth Powder

● If you really want teeth that glisten and gleam... a smile that's bright and attractive, here's your answer! Try the new, modernized Pepsodent, the one and only dentifrice that offers you the extra effectiveness of that wonderful tooth cleanser, Irium.

For remarkable Irium gives Pepsodent greater cleansing power—helps to quickly brush away dingy surface—stains and polish teeth to their full natural radiance! Its action is speedy... thorough... SAFE! Contains NO GRIT, NO PUMICE, NO DRUGS! Get yours today!

Prize Winning Recipes To Be Announced Soon

C. Houston Goudiss, who writes our "WHAT TO EAT AND WHY" series, reports that the Cake Recipe Contest which he recently conducted through the columns of this newspaper was a gratifying success.

A tremendous number of recipes were submitted and the home economists on the staff of his Experimental Kitchen Laboratory in New York city have been busy for days testing and tasting almost every imaginable kind of cake. They report that our town has some very fine cake bakers!

Because of the volume of recipes submitted, they will require a little while longer to complete their tests and to arrive at their decision as to the winners of the \$25.00 first prize, the five second prizes of \$10.00 each, and the ten third prizes of \$5.00 each.

Prize winners will be reported in these columns in the near future, and as announced at the beginning of the contest, prize winning recipes, together with those receiving honorable mention from the judges, will be printed in a booklet to be distributed nationally.

WAGE BILL JUGGLING

Conferees Agree on Compromise Terms Which Leave the Southerners Angry and Highly Dissatisfied

Scene near the French-Spanish border where bombing planes, supposedly from Franco's forces, invaded France to attack the railroad that carries supplies from Toulouse to the Loyalists in Barcelona.

Edward W. Pickard
SUMMARIZES THE WORLD'S WEEK
© Western Newspaper Union

Wage-Hour Compromise

CONFEREES of senate and house who were trying to draft a compromise wage-hour bill that both bodies would accept defied threats of a filibuster by Southerners and agreed on wage and hour provisions which met some of the Southerners' demands but left them still dissatisfied and angry.

Overriding protests that the wage scale agreed upon will re-establish the outlawed national recovery administration, the conferees adopted provisions calling for:

Establishment of a 25 cents per hour minimum wage for the first year and increasing to 30 cents in the second year.

Establishment of industrial boards and an administrator to fix wages between 30 cents and the ultimate goal of 40 cents during the next five years.

Providing for a flat 40-cent minimum after seven years unless an industry gave adequate proof that such a rate was unsound economically and would "substantially curtail employment opportunities."

Establishment of a maximum work week of 44 hours during the first year, reducing to 42 hours in the second year and to 40 hours thereafter.

The work week would not apply where union contracts already in effect permit hours in excess of the maximum fixed in the bill.

Plan Relief Politics Quiz

HARRY HOPKINS, head of the WPA, asserted that the renomination of Senator Gillette by Iowa Democrats showed that his vast organization was not playing politics. But prominent Democratic senators are not so sure this is true, or will be true during the remainder of the year. Ten of them signed a resolution, introduced by Millard E. Tydings of Maryland, calling for the appointment of a senatorial committee of three to investigate any charges of politics in relief that may arise during the 1938 election campaign. The resolution made no reference to the Iowa primary in which Hopkins backed Otha Wearin, the loser.

Senator Tydings

The ten signers of the resolution, including both supporters and critics of the Roosevelt administration, were, besides Tydings: Adams of Colorado, Bulkley of Ohio, Burke of Nebraska, George of Georgia, Gerry of Rhode Island, Hatch of New Mexico, King of Utah, McAdoo of California and Wagner of New York.

Senator Hatch said he would try again at the next session to impose restrictions on participation by relief workers in party conventions or other political activities.

House Ousts Jenks

ARTHUR B. JENKS, Republican, who had served 18 months of his term as representative from New Hampshire, was unseated by the house and replaced by Alphonse Roy, Democrat, who was declared defeated in the 1936 election. The vote to oust Jenks was 214 to 122. When it was announced, all the Republicans, Progressives and Farmer-Laborites and some Democrats marched out in a body as a gesture of protest.

This action by the house was apparently taken to aid the campaign of Senator Fred Brown of New Hampshire for renomination. Roy has a large following among the French population of Manchester, N. H.

Wheat Allotment Check

FIELD representatives of the agricultural adjustment administration began checking farmer participation in the AAA program to determine 1939 wheat allotments in the ten north central states. The check also will determine eligibility of

farms for wheat loans and for premiums on farms covered by crop insurance.

Officials of the AAA in Washington indicated that rates for loans on the forthcoming wheat crop may range from 60 to 86 cents a bushel, depending on grade and distance from markets.

Authorized under the new farm law to set the rates between 52 and 75 per cent of a "variety" price, which government economists have placed at \$1.15 a bushel, the officials said the "base" rate, the amount to be paid on a standard grade of wheat at a definite market, would be close to 60 cents a bushel.

Loan rates will be lower with the distance from central markets. AAA spokesmen indicating that the loan rate in western Kansas, for example, might be as low as 40 or 45 cents a bushel.

The AAA is hoping, officials said, that growers would not approve rates which would tend to retard exports by pegging prices above those in world markets. The aim of the loan, they pointed out, is to help farmers withhold surplus wheat to prevent upsetting of prices.

Wearin Loses in Iowa

OTHA WEARIN, Iowa representative favored by the Roosevelt administration for the Democratic senatorial nomination, was defeated in the primaries.

Running far ahead of him was Senator Guy M. Gillette, who had been marked for elimination because he voted against the court packing bill. Gillette supporters said President Roosevelt maintained neutrality in the contest, but Otha Wearin

Wearin had received the approval of Harry Hopkins, WPA administrator, and of James Roosevelt, the President's son and secretary. Also, Thomas G. Corcoran, the President's political adviser, was known to have worked for Wearin's cause, or perhaps it should be put, against Gillette.

Gillette sought renomination for the senate on a platform of loyalty to President Roosevelt, but said he would retain the right to judge each New Deal proposal on its individual merits if he is re-elected. He was one of the foes of the President's court reform plan, but supported the reorganization bill and other administration measures.

In the Republican side of the primary Former Senator L. J. Dickinson, uncompromising foe of the New Deal, defeated Representative Lloyd Thurston.

Huge Navy Plane Planned

THE house appropriations committee included in the second deficiency bill an additional billion dollars for construction of the world's largest military plane, and the Navy department is now ready to go ahead with the construction of the monster, which may weigh 50 tons. The original model will cost upward of \$3,000,000.

Rear Admiral Arthur B. Cook, chief of the bureau of aeronautics, said the new plane would exceed considerably the 5,000-mile range needed for a nonstop round trip from San Francisco to Honolulu. The plane will be partly armored and will carry a crew of 10 to 14 men. It is expected to be the forerunner of a squadron of 15 or more in the next few years.

For Rivers and Harbors

UNANIMOUS approval was given by the senate to the \$37,000,000 rivers and harbors bill, but provisions giving the War department sole jurisdiction over water developments were eliminated. These projects were left under the control of the federal power commission.

The senate accepted an amendment by Senator Norris of Nebraska exempting the Tennessee Valley authority from the jurisdiction of the secretary of war.

Carefree Cotton Fashions

THESE two designs are particularly good inspirations for summer daytimes—they're cool, simple, becoming and easy to make. More than that, they are styles that adapt themselves to all seasons and many different materials, so that you can use them over and over again. The house dress can be made in a few hours, with a diagram, and the jumper frock includes a detailed sew chart, so it's no trouble at all.

House Dress in Large Sizes. With darts at the waistline and inside tucks on the shoulders, this dress has an unusually good line—trim and slenderizing. Pleats in the short sleeves make them loose and easy to work in. It buttons down the front, and therefore goes on in a jiffy. Gingham, seersucker, percale and broadcloth are the best materials for this. Trim it with bright ricrac braid.

Girl's Jumper Blouse Frock. With a jumper frock in dark cotton and several crisp white blouses, it's easy to keep your young daughter looking fresh and smart—and cuts down on the laundry, too. This style, with its flare skirt and puff sleeves, is the most becoming fashion in the world for

girls between six and eighteen. For the jumper, choose shantung, pique, gingham or linen. For the blouse, frilly, sheer things like dimity, organdy, mull or dotted Swiss.

The Patterns. 1533 is designed for sizes 34, 36, 38, 40, 42, 44, 46, 48 and 50. Size 36 requires 4½ yards of 35-inch material. 1½ yards ricrac braid to trim.

1520 is designed for sizes 6, 8, 10, 12 and 14 years. Size 8 requires 1½ yards of 35-inch material for the blouse; 2 yards of 35-inch material for the jumper.

Spring-Summer Pattern Book. Send 15 cents for the Barbara Bell Spring and Summer Pattern Book which is now ready. It contains 109 attractive, practical and becoming designs. The Barbara Bell patterns are well planned, accurately cut and easy to follow. Each pattern includes a sew-chart which enables even a beginner to cut and make her own clothes.

Send your order to The Sewing Circle Pattern Dept., 149 New Montgomery Ave., San Francisco, Calif. Patterns 15 cents (in coins) each.

Strange Facts

Movies Catch Fire-Rain

A RAIN of fire, thousands of degrees in temperature, fell upon the surface of the sun. Sprays of flaming atoms shot up 150,000 miles from the sun's surface. A terrific explosion took place in which part of the sun's atmosphere was lifted 600,000 miles above the sun's surface. On the earth there were clear skies and cloudy skies, sunshine and rain. Men and women going about their daily work saw nothing strange or different in the heavens above. Even the sensitive radio waves were not disturbed. Yet one instrument, made by man, recorded this rain of fire.

The spectroheliograph is the instrument invented by scientists which has made possible these amazing photographs of fire-rain. This instrument is essentially a spectroscope with a slit which transmits only one line of the spectrum. A photographic plate is moved across the slit at a rate equal to the sun's apparent rate of passage, the sun's light entering the slit through the object glass or mirror of a telescope. On September 17, 1937, the eye of the solar camera received and recorded celestial fireworks in motion pictures which made the most eminent scientists of America gasp with astonishment and wonder.

These solar pictures were shown for the first time in Philadelphia at the recent annual meeting of the American Philosophical society. They are the work of Dr. Robert R. McMath. The rain of hot fire falling upon the sun, revealed for the first time by improved solar photography, presents the greatest mystery. No one knows why it rains fire on the sun, or where the fire-rain comes from.

Uncle Phil Says:

When the Good Work Begins There's a good chance for your getting ahead when you get dissatisfied with yourself instead of the job.

Once a father sends his boys to college, every generation of that family has to do it.

If you know how to spend your money you can seem like a magnate on \$3,000 a year.

Two of a Kind

We have discovered that the man who talks in a whisper doesn't know any more than the fellow who bellows.

It is a tragedy when a man gets late in life what he thinks he wants and finds he doesn't want it.

Smiles
Going Down
Two cronies met at lunch. "How's things?" one asked. "How are they? Rotten, old boy. Honestly, if they keep on like this it looks as though my last income tax return will be just about correct!" said the other, gloomily.

When she thinks he's perfect, she's in love. When she makes up her mind to improve him, she means marriage.

Spring Daze
Mrs. Easley—Three moves are as bad as a fire.

Mrs. Harder—Yes, and one visit of the paper hangers beats a cyclone.

Madness?
Kulper—What reason have you for marrying my daughter, young man?
Fogmore—No reason at all, sir; I'm in love with her.

A Glorious Inheritance
If we do our best! if we do not magnify trifling troubles; if we look resolutely, I will not say at the bright side of things, but at things as they really are; if we avail ourselves of the manifold blessings which surround us, we can not but feel that life is indeed a glorious inheritance.—John Lubbock.

CHRISTIAN SCIENCE CHURCHES

"Is the Universe, including Man, Evolved by Atomic Force?" will be the subject of the Lesson-Sermon Sunday, June 19, in all Churches of Christ, Scientist.

The Golden Text will be: "Our help is in the name of the Lord, who made heaven and earth" (Ps. 124:8). Other Bible citations will include: "Through faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear" (Hebr. 11:3).

The Lesson-Sermon will also include the following passage from the Christian Science textbook: Theorizing about man's development from mushrooms to monkeys and from monkeys into men amounts to nothing in the right direction and very much in the wrong. . . . Spirit can form no real link in this supposed chain of material being. But divine Science reveals the eternal chain of existence as uninterrupted and wholly spiritual yet this can be realized only as the false sense of being disappears" (p. 172).

PETITION TO ORGANIZE SANITARY DISTRICT

TO THE HONORABLE BOARD OF SUPERVISORS OF THE COUNTY OF SANTA CLARA, STATE OF CALIFORNIA:

We, the undersigned, residents and freeholders within that portion of Santa Clara County hereinafter described, desiring the formation of a sanitary district therein, hereby petition your honorable body to take all necessary proceedings for the organization of a sanitary district within said territory under and pursuant to the provisions of the act of the Legislature of the State of California known as Chapter 171, of the Statutes of 1923, and amendments thereto.

The name of the proposed district is the "CAMPBELL SANITARY DISTRICT" and the boundaries thereof are particularly described as follows, to-wit:

Beginning at the point of intersection of the westerly extension of the line parallel to and one hundred seventy five (175) feet northerly from the center line of Hamilton Avenue with the line parallel to and one hundred seventy five (175) feet westerly from the center line of the Santa Clara-Los Gatos Road, which point is also located in the S. E. 1/4 of the N. E. 1/4 of Sec. 27 of Twp. 7 S. R. 1 W. M. D. B. M., and running thence southerly parallel to the center line of said Santa Clara-Los Gatos Road to a point one hundred seventy five (175) feet northerly from the center line of Latimer Avenue;

thence westerly parallel to the said center line of Latimer Avenue eighteen hundred fifty (1805) feet; thence southerly parallel to the center line of the Santa Clara-Los Gatos Road to a point one hundred seventy five (175) feet northerly from the center line of Campbell Avenue; thence westerly parallel to the said center line of Campbell Avenue fourteen hundred sixty (1460) feet; thence southerly parallel to the center line of the Santa Clara-Los Gatos Road three hundred fifty (350) feet; thence easterly parallel to the said center line of Campbell Avenue fourteen hundred sixty (1460) feet; thence southerly parallel to the center line of the Santa Clara-Los Gatos Road to a point one hundred seventy five (175) feet southerly from the center line of Rincon Avenue; thence easterly parallel to said center line of Rincon Avenue to a point one hundred seventy five (175) feet westerly from the center line of the Santa Clara-Los Gatos Road; thence southerly parallel to said center line of the Santa Clara-Los Gatos Road sixteen hundred ninety and eighty five hundredths (1690.85) feet more or less, to the westerly extension of the southern line of Lot 3 of the Kennedy Tract;

thence easterly along the southern line of Lots 3, 5, and 6 of the Kennedy Tract as extended westerly, to the southeastern corner of said Lot 6; thence northerly and northeasterly along the southeastern line of said Lot 6 to the southeastern line of Rucker's Addition; thence northeasterly along said southeastern line of Rucker's Addition to the center line of Los Gatos Creek; thence along the center line of Los Gatos Creek northeasterly and northerly to a point one hundred seventy five (175) feet northerly from the center line of Hamilton Avenue; thence westerly parallel to said center line of Hamilton Avenue to the point of beginning, all as said avenues, lots and tracts are delineated on maps which are a part of the Official Records of Santa Clara County, said enclosed district being a portion of Sections 26, 27, 34, and 35 of T. 7 S. R. 1 W. M.D.B.M.

Your petitioners pray that the land included within said boundaries be so organized as such sanitary district under the provisions of said Act.

Respectfully,
Walter I. Merrill H. M. Shadle
Ralph H. Hyde Antone Ferro
Ira R. Abbott T. A. Cutting
Jack E. Murdock Guy E. Farley
Jack Youngren C. W. Shumway
Mrs. Edna F. Smith D. W. Clark
Ray Mathis William Penhall
Hans E. Hansen W. W. Lamb
Mrs. Marie R. Potter
Jos. O. Levertton G. E. Jeffers
John Fortini C. P. Klassen
Fred E. Jones Ira H. Grim
Carl B. Field S. N. Hedegard
Mrs. Eva Grattan

STATE OF CALIFORNIA)
COUNTY OF SANTA CLARA) ss.
Walter I. Merrill, being duly sworn, says:

That he is a resident and freeholder within the proposed district which is described in the foregoing petition; that he knows personally each and every person whose name

The stanza above is proof positive that there is a word that rhymes with "orange" — even though we have to call upon a tiny river in Wales to help us out.

Our own paring knives prove that an orange is easy to slice — provided we choose a Navel orange with no seeds and its very thin dividing membranes.

Now that Navel oranges are on the market, why not prove the deliciousness of Orange and Prune Salad and Orange Walnut Cheese Salad — two dishes that may be prepared easily by following these simple recipes?

Orange and Prune Salad
(Serves 4)
4-5 Navel oranges, peeled and sliced
30 prunes, cooked
Peanut butter
Lettuce or other salad greens

Mrs. Clara Lee Jenkins, who has been visiting her daughter, Mrs. Freeman Howes for the past few weeks, is leaving tomorrow for her home in Whittier.

is signed to the foregoing petition; that he circulated the foregoing petition and saw each and every signature attached thereto, and that each is the true signature of the person whose name it purports to be and of a resident and freeholder within the proposed district.

WALTER I. MERRILL
Subscribed and sworn to before me this 15th day of June, 1938.
Frank W. Hogan,
County Clerk.
By J. E. Witherspoon,
Deputy Clerk.

Remove prune pits and stuff with peanut butter. Arrange five orange slices on lettuce and center each with a stuffed prune. Serve with lemon juice and honey dressing if desired.

Orange Walnut Cheese Salad
(Serves 4)
5 or 6 Navel oranges
24 walnut halves
1 small package cream cheese

Peel oranges. Slice 1 orange; segment the rest. On lettuce-covered salad plate center a large slice of orange. Arrange 3 groups of orange segments (3 segments to a group) around this orange slice. Moisten cheese with a little orange juice, shape into balls and press walnut halves into two sides. Place one of these walnut cheese balls between each group of orange segments. Garnish orange slices with strips of pimiento. Serve with any desired dressing.

Many Wrote Parodies
One of the oldest parodies is "The Battle of the Frogs and Mice," imitating an Homeric struggle. Aristophanes was a master of the form, especially in his parodies of Euripides. In English literature, there are parodies of and by Shakespeare, while Thackeray's "Burlesques," the "Rejected Addresses by H. and J. Smith," portraying contemporary poets, and the works of C. S. Calverly are among the best examples of the art.

Genuine Optimist
An optimist is the fellow who takes the cold water thrown upon his propositions, heats it with enthusiasm, makes steam and pushes ahead.

THE AWFUL PRICE YOU PAY FOR BEING NERVOUS
Quivering nerves can make you old and haggard looking, cranky and hard to live with — can keep you awake nights and rob you of good health, good times and jobs.
What you should try is a particularly good woman's tonic — and could you ask for anything whose benefits are better proved than that world-famous Lydia E. Pinkham's Vegetable Compound? Let its wholesome herbs and roots help Nature calm your shrieking nerves, tone up your system, give more energy and make life worth living again.
More than a million women have reported benefit — why not let Pinkham's Compound help YOU, too, to go "smiling thru" trying times like it has other grateful women for the past 3 generations? IT MUST BE GOOD!

THE CAMPBELL PRESS

"If I don't live up to my label, 'HOT,' it is no fault of mine. Yet there are folk who try to twist my neck off when I'm not so hot. If I was connected with a water heater that ran itself without depending upon someone to start it and stop it, I would be faithfully serving hot water 24 hours a day." signed H. FAUCET

With summer right at hand every faucet in your home that is labeled hot, should be instantly able to deliver hot water when you need it. Quick shower and tub baths will freshen up your body and spirits. Stockings and dainties doused in warm sudsy water and thoroughly rinsed are quickly made sweet and clean. In the kitchen and in the laundry, hot water on tap is a most welcome hot weather helper. Make sure your home has this kind of service an Automatic Gas Water Heater can best provide. As little as ten cents a day will buy and install an Automatic Gas Water Heater in your home.
